45. Epilogue: Beyond Empire? <i>Frederick Cooper</i>	1249
<i>Index of Places, Names, and Events.</i>	1279

THE OXFORD WORLD HISTORY OF EMPIRE

- Unparalleled coverage of the phenomenon of empire in world history, reaching either further back or across a greater expanse of space than any predecessor
- A daring synthesis of the imperial experience across the full span of history
 - An important paradigm for the study of empire, generating a non-Eurocentric world history
 - A unique combination of syntheses, comparative thematic discussions, and in-depth treatment of a very wide range of individual empires, from Asia, Europe, Africa, and the Americas
- Against the backdrop of world history, European colonial rule emerges unexpectedly as an especially unstable form of imperialism
